

For Immediate Release

HEADLINE: Ian MacGregor repeats as U23 National Champion on a Javelin

LITTLE ROCK, Arkansas – June 27, 2005 – Ian MacGregor of the TIAA-CREF cycling team successfully defended his Under 23 National Road Race Title in the 125-mile road race at the Park City Cycling Festival on Saturday.

He finished the race in 5:02:17 on a day when 117 riders would start, but heavy rain and wind would reduce the finishing field to only 47. Ian's success was a result of contributions from his TIAA-CREF teammates. Jonathan Vaughter's under-25 development team had twelve members start the race, and eight of them finished in the harsh conditions.

The team dominated the race by placing four riders in the top ten. Mike Lange supported MacGregor until the end and earned third. Stu Gillespie provided additional support to place fourth, and Craig Lewis finished in eighth position.

It was a 100% team effort today," said MacGregor. "Every rider on TIAA-CREF gave it everything they had today. The guys rode absolutely amazing."

Also, in Thursday's Junior Men's Road Race, Team 5280 Magazine riders Peter Stetina crossed the line hand-in-hand with Tejay van Garderen. Stetina took first; van Garderen earned second – both on Javelin Brunellos. Tejay also won the Junior Men's 17-18 Criterium. It was his tenth National Championship. Team 5280 Magazine is the Junior arm of the TIAA-CREF Program.

The TIAA-CREF cycling team is proving itself to be one of the best programs in the world at developing young talent," said Mac McEneaney, Vice President of Sales and Marketing of Javelin. "Jonathan Vaughters knows what it takes to develop these cyclists and get them the experience necessary to take the next steps in their careers. He's been there."

The Javelin Brunello that TIAA-CREF and Team 5280 Magazine races is a stock high-performance frameset that was developed specifically for riders seeking the perfect race-ready frameset. It is a Scandium and carbon fiber mix that allows the power transfer that a pro cyclist wants and the vibration dampening that is needed in a 125 mile race.

More information is available on the TIAA-CREF Professional Cycling Team at www.tiaacrefcycling.com and on Javelin bikes at www.javbike.com.

The complete Javelin line is offered through select, high quality bicycle retailers and is headquartered in Little Rock, Arkansas, its home of eleven years.
