

JAVELIN

Hand-crafted Italian Bicycles

For Immediate Release

HEADLINE: Javelin Bicycles Announces Sponsorship of Ryan Giuliano

LAKE ZURICH, Illinois - April 5, 2016 – Javelin Bicycles is excited to announce that Ryan Giuliano is joining the Javelin team. Giuliano, a decorated duathlete, has transitioned his skills into 70.3 and full iron-distance triathlons. Now established as an top elite amateur, Giuliano plans a return to the Ironman World Championships, in Kailua-Kona, Hawaii, hoping to improve on his 2015 9:06 performance.

"After having a great finish to the 2015 racing season, I've been looking for ways to improve and get faster. The longest part of every triathlon, the bike, was where I searched first. This is where Javelin enters the picture," said Giuliano. "Custom build options allow me to create a strong, aerodynamic, and comfortable position without needing to work around a standard frame size."

In 2016, Giuliano has committed to racing the North American Ironman Championship, Ironman Lake Placid, and the Ironman 70.3 World Championships before culminating his season in Kona at the Ironman World Championships.

For over two decades Javelin has been custom building bicycles that combine the best American engineering with the finest Italian craftsmanship. Purpose built with the rider in mind, we utilize wind tunnel data, fluid dynamics and computer modeling to create the bike of your dreams. Javelin's Italian artisans create each frame unitizing a unique hand-wrapped tube-to-tube construction process. This process allows us to offer limitless customization options including electronic optimization, integrated seat mast, disc brakes, and of course geometry. Our product line includes a full range of high performance frames in the road, track, cyclocross and time trial disciplines.
